# RuleBuilder
This repository is holding a project to create rules based on desired parameters. JQuery and C# is being used to create rules.

This project allows the end user to create rules using some predefined parameters. The created rule can be applied to define rules for any organization like- financial process oriented tasks.

Initial rule screen when there is no rule created.

After creating a rule-

Rule Name   Test rule

IF ▼

1

| Parameter ▼ | Region ▼ | Equals ▼ | Value ▼ | Dhaka |

Add a Condition | Start Block | Close Block | Delete Block

Rule output:

| Numeric ▼ | Value ▼ | 120 |

Add an Action

ELSE ▼

2

Add a Condition | Start Block | Close Block | Delete Block

Rule output:

| Numeric ▼ | Parameter ▼ | Exclusive ▼ |
